

SIVASANKARAN E

B.Tech — Artificial Intelligence & Data Science

Villupuram, Tamil Nadu | sivasankaranelu2006@gmail.com | +91-9360641905 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

B.Tech student specializing in Artificial Intelligence & Data Science, focused on building end-to-end machine learning, data engineering, and automation systems — from database design to real-time dashboards and LLM-powered pipelines. Delivered three self-driven data/AI projects alongside academic coursework, with additional professional exposure to full-stack web development. Eager to contribute technical expertise to AI and data science-focused roles.

SKILLS

Languages: Python, SQL, HTML5, CSS3, JavaScript

Databases: MySQL, PostgreSQL, SQLite

Frameworks & Libraries: React, Streamlit, Flask, Bootstrap

ML / Data: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Automation & APIs: Playwright, APScheduler, REST APIs, LLM API Integration (Groq, Gemini)

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab

Concepts: Machine Learning, Data Analysis, ETL, Prompt Engineering, Generative AI, Web Development, Process Automation

PROFESSIONAL EXPERIENCE

Web Development Intern — Macx Technologies

Feb 2024 – Mar 2024

- Contributed to front-end development by building responsive web interfaces with HTML, CSS, JavaScript, and React.
- Gained hands-on exposure to real-world development workflows, including Git version control, code reviews, and REST API integration.

PROJECTS

Internship Application Automation System

Jun 2026 – Jul 2026

Python, Playwright, SQLite, Streamlit, LLM APIs

- Built an end-to-end automation pipeline that scrapes internship listings from Internshala, LinkedIn, and Unstop using Playwright and auto-fills application forms.
- Designed a custom matching engine to filter and rank internship listings against user profile criteria.
- Integrated free-tier LLM APIs (Groq Llama 3.1 70B with Google Gemini as fallback) to generate personalized cover letters.
- Implemented a lightweight local-first architecture using SQLite for storage, Streamlit for a monitoring dashboard, and APScheduler for automated scheduled runs.
- Added Gmail SMTP email alerts and deployed the system as a fully free, self-hosted solution (local PC, Google Colab, or Oracle Cloud Free Tier).

Learning Progress Tracker Dashboard

Aug 2025 – Nov 2025

Python, MySQL, Streamlit

- Built a personal learning management web app enabling users to log courses, set weekly goals, track completion status, and visualize learning velocity over time.

- Architected a normalized MySQL database with tables for topics, resources, progress logs, tags, and priority ratings; enforced referential integrity with foreign key constraints.
- Enabled dynamic filtering by domain, status, and priority with a Streamlit UI, allowing learners to surface high-priority pending items instantly.
- Added an analytics module computing weekly study hours, streak tracking, and completion-rate trends rendered as interactive Plotly charts.
- Applied secure credential handling with python-dotenv and structured the codebase using modular MVC-style separation for maintainability.

WattWise — Smart Energy Optimization Platform

Feb 2024 – Mar 2024

Next.js, React, TailwindCSS, Google Genkit (Gemini AI)

- Built a full-stack AI-powered energy monitoring and optimization platform using Next.js 15 (App Router), React 18, and TailwindCSS, with a shadcn/ui and Radix UI component library for a responsive dashboard experience.
- Developed an interactive single-pane-of-glass energy dashboard integrating real-time consumption monitoring, CSV/JSON historical log uploads, Recharts visualizations, and goal-setting and tracking widgets.
- Engineered three Google Genkit AI flows powered by Gemini 2.0 Flash: an energy consumption predictor, a personalized energy-saving advisor, and a conversational energy assistant chatbot.
- Implemented TanStack Query (react-query) for efficient client-side state management and asynchronous data fetching across dashboard widgets.
- Integrated Firebase SDK for backend data persistence and configured Turbopack for optimized, fast production builds.

EDUCATION

B.Tech — Artificial Intelligence & Data Science, IFET College of Engineering, Villupuram, Tamil Nadu

2023 –

2027

CGPA: 8.3 / 10.0

- Relevant coursework: Machine Learning, Data Structures & Algorithms, Database Management Systems, Artificial Intelligence, Big Data Analytics, AI Ethics & Societal Impact.

Higher Secondary (Class XII) — Computer Science, St. John's Higher Secondary School, Tamil Nadu

2022 – 2023

Percentage: 89%

CERTIFICATIONS

- Foundations of Prompt Engineering — AWS Training & Certification, Jul 2026
- Data Processing and Visualisation — NASSCOM FutureSkills Prime, Jul 2026
- Introduction to Data Engineering — IBM (Coursera), Mar 2026
- Claude Code in Action — Anthropic, Feb 2026
- Generative AI for All — Infosys Springboard, Jan 2026
- Data Analytics Professional Certificate (30-Day MasterClass) — NoviTech R&D, Feb–Apr 2025

ACHIEVEMENTS & ACTIVITIES

- Participated in national-level hackathons focused on AI and smart city solutions.
- Active member of the college AI & Data Science Club — conducted workshops on Python and data visualization for junior students.
- Completed 30+ Python programs covering ML, data analysis, clustering, regression, and anomaly detection as part of coursework portfolio.
- Prepared research-level study material on AI ethics covering fairness, transparency, accountability, and societal impacts across healthcare, finance, and social media.
